

WASTEWATER SERVICE OVERVIEW

WHAT WE DELIVER

MSI's wastewater group brings strong expertise in helping clients meet both current infrastructure demands and future system goals. Our team offers comprehensive support across all phases of a project, including funding assistance, planning, design, bid document preparation, permitting, bidding, and construction-phase services.

We've successfully delivered a wide range of wastewater solutions—from sewer lining and rehabilitation to the design of complete wastewater treatment plants. No project is too large or too small. Our team takes pride in listening carefully to each client to understand their specific challenges, goals, and expectations.

By working collaboratively, we develop practical, cost-effective, and operator-friendly solutions tailored to your needs. Reach out to Maurer-Stutz today to discuss your wastewater project and take the first step toward becoming a valued partner in the design process.

CLIENTS WE SERVE

- Municipalities
- Sanitary and Water Reclamation Districts
- Water/Sewer Commissions
- Private Developers

OUR SERVICES

PLANNING & EVALUATION

- Facilities Planning Studies
- Infiltration/Inflow Studies
- Sewer System Evaluation Studies
- Rate Studies
- Asset Management using GIS & Locating Equipment

DESIGN & REHABILITATION

- Collection System Design & Rehabilitation
- Pump Station/Force Main Design & Rehabilitation
- Treatment Plant Design & Rehabilitation
- Combined Sewer Overflow Mitigation & Abatement

MODELING & CONTROL

- Comprehensive Wastewater Collection System Modeling
- Long-Term Control Plans for Combined Sewer Systems

SUPPORT SERVICES

- Permitting Assistance
- Project Funding Assistance
