

WATER SERVICE OVERVIEW

WHAT WE DELIVER

MSI's water group has extensive experience helping clients address both current challenges and future water system needs. We offer expertise in funding assistance, planning, design, bid document development, permitting, bidding, and construction-phase services for a wide range of water-related projects.

From lead service line removals to water treatment plant design, no project is too large or too small. We take pride in listening to our clients to understand their concerns, goals, and expectations. Together, we can develop solutions that are efficient, cost-effective, and operator-friendly.

Contact Maurer-Stutz today to discuss your next water project and become a key member of the design team.
