Agriculture- Our agriculture group specializes in offering comprehensive services encompassing facility planning and design, nutrient management, waste handling, agrichemical facilities, conservation practices, and farm spill prevention. We meet individual agricultural needs with innovative and sustainable solutions, boosting productivity and environmental care.

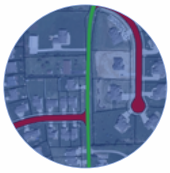

Civil- MSI's civil group encompasses a wide range of projects such as commercial buildings, dams, railroads, industrial facilities, medical centers, parking lots, schools, subdivisions, and parks. We offer expert planning, design, and implementation ensuring efficient, safe, and community-enhancing results.

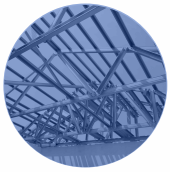

Conservation- Our conservation experts focus on regulatory compliance, nutrient reduction practice design, erosion control, storm water management, drainage, flood prevention, and wildlife conservation. We prioritize green infrastructure like rain gardens and ecological preservation for responsible development and environmental protection across various projects.

Construction- The MSI construction team provides on-site observation, material testing and documentation for a variety of projects. We have experience with projects ranging from MFT maintenance, roadway reconstruction, signals and lighting, bridge construction/rehabilitation and underground utilities. Our distinctiveness in the field stems from our proactive approach to identifying issues before they arise.

Geospatial- The GIS group at MSI works to provide advanced geospatial solutions and analysis to governmental agencies and utilities. Our expertise in planning and analysis helps optimize infrastructure projects, enabling informed decision-making and efficient resource management for various public sector initiatives.

Structural- The structural group at MSI specializes in designing and analyzing diverse projects like agricultural, commercial, industrial, and residential buildings as well as parking structures and transportation systems. Our structural team is dedicated to ensuring the utmost safety, reliability, and stability of various structures.

Survey- The MSI survey group provides comprehensive services, including land, topographic, hydrographic/bathymetric surveys, control surveys, and construction staking and layout, ensuring precise data collection and reliable project planning across diverse disciplines.

Transportation- Our firm offers an impressive transportation service portfolio, encompassing expertise in designing and constructing bridges, highways, freeways, intersections, recreational trails, and roads and streets. With a focus on safety, efficiency, and sustainability, we provide innovative solutions to enhance mobility and connectivity for communities and travelers.

Water/Wastewater- Our comprehensive water/wastewater services cover planning, collection, treatment, distribution, storage, and wells/pump stations, ensuring sustainable water management with safe access to clean water and responsible wastewater handling for environmental preservation.
